Getting started

For project leaders

- Please gather your team members' GitHub usernames and polish your project README. (Fill the form to get your repo.)
- Think about what venue(s) you are going to submit your research!
- If you foresee any significant compute or other logistical requests, please send them to Michael via email. For AI subscriptions, fill out the form!

Computing resources

AWS

Cloud servers (**EC2**) for experiments and hosting lab tools; object storage (**S3**) for datasets and results.

Request an instance or storage for your project.

[EC2 guide ↗](#)

Hyak

UW's shared computing cluster for CPU-intensive computation, parallel jobs, and moderate GPU workloads.

Use **Open OnDemand** in your browser, or SSH. **Slurm** schedules jobs.

[Getting started ↗](#)

Tillicum

UW's **NVIDIA H200 GPU** cluster for AI and GPU-intensive research.

Join a project allocation, activate your UW research-computing account, and run GPU jobs with **Slurm**.

Contact Michael for computing requests: zengrf@uw.edu.

Describe your project, CPU/GPU needs, memory, storage, and expected run time.
